

I want the regulations restricting media ownership to be continued and perhaps even strengthened. It is not in the best interests of our country and democracy to permit ownership of media outlets to be concentrated in a few hands. As far as I am concerned, media ownership is already in too few hands. We do not receive a wide enough or variety enough of news coverage or editorial opinion from enough different sources. Please consider our history and our country and compare this to countries with limited and/or controlled media - do you wish for us to go down that road? That is no legacy to leave.
